Sanjay Saji

UNITY DEVELOPER & GAME PROGRAMMER

PROFILE

Engineering student and game programmer with a strong foundation in Unity and C#. Passionate about building immersive, playable experiences — from mobile endless runners to AI-driven ecosystem simulations. Quick learner with solid problem-solving skills, eager to contribute to a collaborative development team and grow within the games industry.

SKILLS

LANGUAGES

C#, C++ (Basic), Python (Basic)

TOOLS & ENGINES

Unity, Blender, Git / GitHub, A* Pathfinding, Procedural Generation, Unity Shaders, Mobile Optimisation, AI Behaviour Trees

EXPERIENCE

Junior Game Programmer Intern — 3 months

Sector4 Interactive

- Built and iterated on gameplay features in Unity and C# alongside a professional game team.
- Worked with designers and senior programmers, using Git for version control and collaboration.
- Debugged issues and contributed to performance improvements across game builds.

PROJECTS

Co-op Horror Game

Cooperative horror game where players team up to survive and escape a hostile environment. Combines multiplayer co-op gameplay with tense atmosphere, lighting and audio-driven scares, and threatening enemy behaviour.

Unity | C# | Multiplayer | Gameplay Systems

Magnet Fishing Simulator

Relaxing simulation where players cast a magnet into waterways to pull up hidden treasures and junk. Features physics-based throwing and retrieval, collectible items, and a satisfying discovery loop.

Unity | C# | Physics | Simulation

ProtoBoat — github ↗

Endless-runner mobile game where players dodge obstacles across dynamic environments. Implemented responsive touch controls, progressive difficulty scaling, and performance-optimised rendering for mobile platforms.

Unity | C# | Unity Shaders | Mobile Optimisation

Fantasy Game Demo

github ↗

2.5D side-scroller featuring platforming, puzzle-solving, and real-time combat. Built advanced enemy AI systems with dynamic behaviour, designed boss encounters, and modelled environment assets in Blender.

Unity · C# · AI Systems · Blender

Ecosystem Simulation

github ↗

Procedurally generated ecosystem where animal agents interact, hunt, and reproduce using behaviour trees and A* pathfinding. Demonstrates emergent AI, realistic animal life cycles, and scalable simulation architecture.

Unity · C# · A* Pathfinding · Procedural Generation · AI Behaviour Trees

EDUCATION

B.Tech — Computer Science & Engineering — **8.1 → 7.9 → 8.04 SGPA**
Delhi Technical Campus, Greater Noida, Uttar Pradesh, India · Currently in 4th Semester — Semesters 1 – 3

Class 12 — CBSE — **86%**
Bright Public School, Valakom, Kerala, India — 2024

Class 10 — CBSE — **88%**
Bright Public School, Valakom, Kerala, India — 2022

LANGUAGES

English · Hindi · Malayalam · Tamil
